

NANO-STAR

CONSTRUCTION MATERIALS SCIENCE

Nano-Star is a Singapore based company that creates new age construction solutions that are faster, stronger, and cleaner. Using the latest technologies in both surface chemistry and nanotechnology, Nano-Star designs and develops highly intelligent solutions and products with outstanding performance for the construction industry.

Nano-Star provides a wide range of products and services, such as:

1. **Nano Waterproofing** using industrial-grade hydrophobic nanoparticles to last beyond 10 years
2. **Thermal Insulative products** for anti-condensation and fire proofing
3. **Concentrated Cleaning Agents** for efflorescence or fungi removal
4. **Restoration Coatings**
